

REPORT ALERT:

PENNSYLVANIA GUBERNATORIAL RACES - SUSPICIOUS VOTE PATTERNS ACROSS 2014, 2018, 2022

HAS VOTE SWAPPING BEEN FOUND?

A GRASSROOTS INVESTIGATION

****Disclaimer: Many volunteers recorded, counted and analyzed what they observed in precinct election results across Chester County, and other counties across Pennsylvania. Though inspected several times, the opportunity exists for human error to be found in what was recorded in any of the charts shown, numbers counted, statements made, etc. in this report. Due to this, it is asked that all authority be placed upon the official precinct and cumulative election results released by the Pennsylvania counties. They are linked to this report. They are official and speak for themselves. This report seeks to shine a light onto what volunteers have observed across Chester County and other Pennsylvania counties in over a decade of election results.**

****It is believed that all candidates featured have done nothing wrong. They are considered innocent as they do not program nor operate voting machines. The question that prevails is who was programming the voting machines for each of the elections shown, and do they know if any unauthorized software was in use?**

GOVERNOR REPORT PRELUDE

Let's imagine there is going to be an election – one where voters will vote for their Governor, US Senator, Representative in Congress and Representative in the General Assembly. Around 102 Republican voters and 88 Democratic voters show up to vote. After the voters go to their precincts to vote, eventually the results are posted into a precinct report.

Official Results
General Election, Nov. 4, Any Year
Somewhere County, USA

<u>United States Senator</u>		<u>Votes</u>
	John (REP)	100
	Dave (DEM)	85
 <u>Gov & Lt. Gov</u>		
	Joe (REP)	102
	Harry (DEM)	88
 <u>Rep. in Congress 00 District</u>		
	Julie (REP)	98
	Phil (DEM)	85
 <u>Rep. in the General Assembly 0 District</u>		
	Tim (REP)	96
	Jane (DEM)	86

As you can see, the Republicans won all races, and their vote totals were pretty close in each race. Now imagine a bad actor wanted to change the outcome, to where the Democratic Governor Candidate would win instead of the Republican.

The bad actor installs secret unauthorized software onto the voting machine tabulators that automatically takes 20 votes off of the Republican Governor Candidate Joe, and adds it onto Democratic Candidate Harry's total. What might this look like?

Official Results
General Election, Nov. 4, Any Year
Somewhere County, USA

United States Senator

Votes

John (REP)	100
Dave (DEM)	85

Gov & Lt. Gov

Joe (REP)	82	(20 votes removed)
Harry (DEM)	108	(20 votes added)

Rep. in Congress 00 District

Julie (REP)	98
Phil (DEM)	85

Rep. in the General Assembly 0 District

Tim (REP)	96
Jane (DEM)	86

Now that the secret unauthorized software was applied to the vote totals, we see Republican candidate Joe's score reduced by 20 votes, and Democratic Candidate Harry's score increased by 20 votes.

Now Joe is the only Republican candidate that loses their race on the ballot in this precinct.

What else is noticed of this new outcome?

Official Results
General Election, Nov. 4, Any Year
Somewhere County, USA

United States Senator

Votes

John (REP) 100
Dave (DEM) 85

Gov & Lt. Gov

Joe (REP) 82
Harry (DEM) 108

Lowest vote total of all
Republican candidates
on the ballot in this
precinct.

Highest vote total of all
Democrat candidates on
the ballot in this precinct.

Rep. in Congress 00 District

Julie (REP) 98
Phil (DEM) 85

Rep. in the General Assembly 0 District

Tim (REP) 96
Jane (DEM) 86

We notice that the Republican Governor candidate Joe now has the lowest vote total of all Republican candidates on the ballot in this precinct. His vote total is 82, which is lower than all the other Republican candidates' totals.

We also notice that the Democratic Candidate Harry now has the highest vote total of all the Democrat candidates on the ballot in this precinct. His vote total is 108, which is higher than all the other Democratic candidates' totals.

Now take what you see in this imaginative demonstration, and think about it when you read about the “lowest vote total” and “lowest/highest” pattern being found in all General elections from 2013 to 2023 in Chester County, PA for specific candidates. What conclusions do you draw? Could vote total manipulation be a real possibility, or not at all?

What if 20 votes specifically were not programmed to be taken off the Republican Governor candidate, but instead, some percentage of the total votes that a computer algorithm figures out? What if this algorithm is set so that each precinct removes a specific amount of votes off the Republican Governor candidate and adds it on to his opponent, which then when added up, results in “pre-set” or “pre-determined” final result numbers?

Keep in mind how the Republican Governor Candidate Joe ended up with the lowest Republican vote total, and how Democratic Governor Candidate Harry ended up with the highest vote total. The concept of *how* this could have happened is what is trying to be explained in this imaginary illustration.

DESCRIPTION OF TWO PATTERNS FOUND:

1. **LOWEST/HIGHEST** – This pattern shows a specific candidate from one party having the lowest vote total of all candidates on the ballot in their same party, while their opponent in the same race from the other party has the highest vote total of all candidates in their party. This is seen happening throughout all or many precincts in a county. This causes concern that “vote swapping” is occurring.
2. **LOWEST VOTE TOTAL** – This pattern shows the same candidate from one party having the lowest amount of votes of all candidates on the ballot in their same party, throughout all or many precincts in a county.

****Disclaimer: Many volunteers recorded, counted and analyzed what they observed in precinct election results across Chester County, and other counties across Pennsylvania. Though inspected several times, the opportunity exists for human error to be found in what was recorded in any of the charts shown, numbers counted, statements made, etc. in this report. Due to this, it is asked that all authority be placed upon the official precinct and cumulative election results released by the Pennsylvania counties. They are linked to this report. They are official and speak for themselves. This report seeks to shine a light onto what volunteers have observed across Chester County and other Pennsylvania counties in over a decade of election results.**

****It is believed that all candidates featured have done nothing wrong. They are considered innocent as they do not program nor operate voting machines. The question that prevails is who was programming the voting machines for each of the elections shown, and do they know if any unauthorized software was in use?**

PA GOVERNOR RACES: SUSPICIOUS PATTERNS ACROSS 2014, 2018, 2022 – HAS VOTE SWAPPING BEEN FOUND?

An investigation into 11 years of precinct-level election results in Chester County, Pennsylvania has uncovered shocking patterns in candidate vote totals. The patterns happened repetitively since 2013 in every general election. Often they are seen in the same races, no matter who the candidate was. Further investigation shows them also happening across the Commonwealth.

The patterns found show the same candidate repeatedly receiving the lowest vote total out of all candidates on the ballot in their same party, **throughout every precinct** in the county or **a large number of precincts**. Additionally, in many cases, the opponent of the person receiving the lowest vote total is seen having the highest vote total of all their candidates. This pattern is called the “lowest/highest” pattern and causes concern votes are being removed from one candidate and added to their opponent (vote swapped). Races where one or both of these “lowest vote total” and “lowest/highest” patterns are found are the Pennsylvania Governor races of 2014, 2018 and 2022.

2014: [Archived 2014 general election precinct results](#) from Chester County indicate that Republican Gubernatorial candidate Tom Corbett received the lowest vote total of all Republican candidates **in all *226 precincts**. **Even in precincts where Corbett won, he still had the lowest vote total**. Not only did Corbett receive the lowest number of Republican votes in every Chester County precinct, he lost in over 50 Republican precincts where all other Republican candidates won. When the Democratic candidates were analyzed, it was discovered that all Chester County precincts gave Democratic Gubernatorial Candidate Tom Wolf the highest amount of votes out of every Democratic candidate on the ballot. Were votes removed from Corbett’s totals and then added to Wolf’s totals? Below are examples from the following precincts: [Caln 4](#), [North Coventry East](#), and [Coatesville 1](#).

VOTE FOR NOT MORE THAN	1		
HARRY LEWIS (REP)	.	608	55.22
JOSH MAXWELL (DEM)	.	491	44.60
WRITE-IN	.	2	.18

Lowest vote total of all Republican candidates in this precinct.
Corbett is the only R loss.

Highest vote total of all Democrat candidates in precinct.

* Note: Corbett’s vote total is roughly 100 votes lower than two other Republican candidates. Wolf’s vote total is roughly 100 votes higher than two other Democrat candidates. Were around 100 votes subtracted from Corbett and added to Wolf? Was this a natural outcome? Would it make more sense for Corbett’s score to be 561 and Wolf’s 540?

VOTE FOR NOT MORE THAN 1		
HARRY LEWIS (REP)	209	45.53
JOSH MAXWELL (DEM)	249	54.25
WRITE-IN.	1	.22

Lowest vote total of all Republican candidates in this precinct; every Republican loses their race.

Highest vote total of all Democrat candidates in precinct.

*Note that Corbett's score is 100 votes less than Lewis in the 74th, and Wolf's score is just over 100 more than Maxwell in the 74th district.

*Please note that precinct 467, Phoenixville Middle 1 (not shown), has a split precinct where certain people vote for one state representative and the others vote for another state representative. This splits up the number of people voting and creates extra low vote totals for the state representative candidates, so they are excluded from

the lowest total vote comparison in this precinct since their vote numbers are skewed. Once they are removed, the Governor pattern appears. This is why an asterick (*) is placed next to the number 226 on the first page of the report. To see all 2014 precinct results and Corbett receiving the lowest vote total in every precinct in Chester County, [CLICK HERE](#).

The 2014 cumulative election results for Chester County present the grand result of the precinct-level anomalies. The Governor's race is the ONLY race Republicans lost in the entire county:

To see the 2014 Chester County General Election summary report, [CLICK HERE](#).

It should be noted that the PA counties of Chester, York and Cumberland had **all** of their precincts give the Republican Governor candidate the lowest vote total in 2014. There could be more than these three, but more investigation is needed into other PA counties. Information on York and Cumberland County is further along in this report.

See the next page to continue to 2018's results in Chester County.

2018: In the 2018 Governor’s race, Chester County’s precinct-level patterns from 2014 re-emerge with Republican Gubernatorial Candidate Scott Wagner. Wagner receives the lowest Republican vote total in 222 of 228 Chester County precincts. An example is shown below, from the London Grove South precinct:

How do you explain 222 of 228 precincts giving the Republican Governor candidate the lowest vote total of all Republican candidates? Wouldn't you expect more variance in who received the lowest vote total across the precincts? How could this happen? Why aren't any bottom-of-the-ballot candidates on the above chart?

What causes the precincts in yellow to break away from giving the lowest Republican vote total to the Governor candidate only?

(Again, please note that precinct 467, Phoenixville Middle 1, has a split precinct where certain people vote for one state representative and the others vote for another state representative. This splits up the number of people voting and creates low vote totals for the state representative candidates, so they are excluded from the lowest total vote comparison in this precinct since their vote numbers are skewed. Once they are removed, the Governor pattern appears in this precinct and is counted.)

0457 PENNSBURY SOUTH-2	US SENATOR, GOVERNOR
0462 PHOENIXVILLE NORTH-2	US SENATOR

All Coatesville precincts except one (Coatesville 4-1) broke the pattern. Why did this occur in these six precincts specifically? Modena is also near Coatesville. It is noteworthy that Wagner did share the lowest vote total in 5 of the highlighted precincts. In the remaining precincts, US Senator candidate Lou Barletta received the majority of the lowest vote totals except for one – the Modena precinct where the Republican Congressional candidate in the 6th District had the lowest vote total.

The next chart will show which 2018 Democratic candidate had the highest vote total of all Democratic candidates in each precinct. See below:

0462 PHOENIXVILLE NORTH-2	REPRESENTATIVE IN THE G.A. 155TH

Democratic Governor Candidate Tom Wolf has the highest vote total in 211 of 228 precincts, or 93% of all Chester County precincts. This is quite the contrast from Republican Governor Candidate Wagner.

Notice the Coatesville precincts, Modena and Phoenixville North-2 appear again in yellow, as they did with the Republican who received the lowest vote totals chart. What is going on in these precincts to change both outcomes?

Finally, which precincts in 2018 had the lowest/highest pattern, causing concern for vote swapping? See below:

The total number of precincts showing the lowest/highest pattern is 215 of 228 total precincts. This is 94% of all precincts and is very concerning. For the Governor race specifically, 212 of 228 precincts show the pattern, or 93%. To see all of the 2018 precinct reports, [CLICK HERE](#).

How do you explain this pattern happening significantly in the Republican Governor races in both the 2014 and 2018 General Elections with two different candidates? Why did Republican voters in Chester County not want to vote for their Governor candidates?

The outcome of the 2018 General Election in Chester County was vastly different than 2014. Republicans lost every race by large numbers that election except for two Representatives in the General Assembly (13th and 26th) and one Representative in Congress 7th District candidate. What happened that Republicans would lose so badly? Was it a natural outcome, or was something else at play given the governor pattern going through almost every precinct yet again? If the governor race was impacted by vote manipulation, could other races have been impacted? [See the 2018 cumulative report](#) below:

SUMMARY REPORT	OFFICIAL RESULTS

GREG MCCAULEY (REP)		97,054	40.95
WRITE-IN		146	.06

*How do you explain Democrats winning the Governor race in 2014 by 5,604 votes, and then in 2018 they win by 57,339 votes? This is a difference of over 50,000 more votes gained by Democrats in Chester County in 2018. Was this natural? Look at the difference in straight party voting between 2018 and 2014. 50,000 more Democrats voted straight party verses 15,000 more Republicans compared to 2014.

DEMS WIN BY

*How do you explain the difference in Democrat straight party voters from the 2016 Presidential election to the 2018 Governor race? In 2016 in Chester County, [66,810 Democrats](#) voted straight party. In 2018, 85,199 voted straight party. This means that 18,389 more Democrats voted straight party in the Midterm election than the Presidential election of 2016. Isn't turnout usually much higher in Presidential elections than Midterm elections?

The Republicans lost straight party voters from 2016 to 2018. In 2016, [67,333 straight party voters](#) voted in the Presidential election. In 2018, 65,880 voted straight party. This is a loss of 1,453 straight party voters. Would this seem more natural?

In 2018, very strange precinct behaviors were noticed. Precincts that were historically Republican were suddenly voting Democrat. See the chart below:

WHAT HAPPENED IN 2018 TO TURN REPUBLICAN PRECINCTS DEMOCRAT?

CHESTER COUNTY PRECINCTS	2013	2014	2015	2016	2017	2018	2019	2020	2021	2022	2023

Why do so many Republican precincts that turned Democrat in 2018, turn back Republican again in 2019? Are these precinct behaviors natural? Is something else going on in the future 2022 Governor race as well?

2022: In 2022, the lowest/highest and lowest vote total patterns emerge for the third consecutive Governor's race, impacting Republican Gubernatorial Candidate Doug Mastriano. Mastriano received the lowest Republican vote total in 225 of 230 precincts. The difference in 2022 is this is the first Governor's race where mail-in ballots were used. Even with mail-in ballots, the patterns continued. What does this say to those in the Republican Party who think that more mail-in ballots are the answer to winning elections? See an example precinct below showing the lowest/highest and lowest vote total pattern:

Precinct Summary Results Report
2022 General Election
November 8, 2022

In the above analysis, the Republican Governor Candidate Mastriano has the lowest vote total of all Republican candidates in 225 of 230 precincts. This is very similar to what happened in 2014 with Republican Candidate Corbett, and in 2018 with Republican Candidate Wagner.

The consistency in this is alarming, and answers are needed as to what is going on in Pennsylvania's Governor elections. This is now three separate Governor races with three separate candidates showing the same pattern. Do Republicans in Chester County despise **all** of their Governor candidates?

Once again we see the Coatesville precincts breaking the pattern, just as we saw in 2018. We also saw a Parkesburg precinct in 2018, though not the same one. Valley South and Caln 2 are also in the Coatesville area. What is going on in these precincts that causes them to not follow the pattern?

One additional race appears in yellow in 2022, which is the Representative of the General Assembly for the 74th District. This district covers the Coatesville area.

More data was run on the 2022 General Election, see below for more information:

The [2022 election results](#) were different from 2014 and 2018, due to the use of mail-in ballots. A breakdown of the total votes, in-person election day votes and mail-in ballot votes are seen in the election results posted by Chester County. The [lowest vote total analysis](#) was conducted again on the [Republican candidates](#) just in the in-person election day votes, and then in just the mail-in ballot votes. What was found was shocking. See the chart below:

CHESTER COUNTY PRECINCTS	TOTAL VOTES	ELECTION DAY VOTES	MAIL-IN VOTES

The above shows something very important. For the in-person election day votes, 224 of 230 precincts gave the Republican governor candidate the lowest vote total out of all the Republican candidates on the ballot (with three ties). Is that natural? For the mail-in votes, 221 of 230 precincts gave the Republican governor candidate the lowest vote total (with 12 ties) out of all the Republican candidates on the ballot. Could this be natural also? **Could there be two separate algorithms running – one for the election day votes, and one for the mail-in ballot votes?** Could these algorithms be taking votes off Mastriano and adding them to Shapiro? How do you explain each category, both election day and mail-in ballot votes, having the Republican governor candidate with the lowest vote total across almost every precinct?

A [report](#) was published in 2023 by an accomplished data analyst and software developer who had obtained 2020 cast vote records from hundreds of counties throughout 27 states in the country. According to this report, which focused on the first nine of the 27 states, evidence from the cast vote records shows that mail-in ballot votes were indeed manipulated in 2020. In the “[Summary of Findings](#),” it is stated: “These findings demonstrate proof that the mail-in votes in the 2020 General elections in those states were altered via a software algorithm.” To see the Fingerprints of Fraud report by [Jeffrey O’Donnell](#) showing this, [CLICK HERE](#). Does mail-in ballot vote manipulation explain the low vote total patterns shown for the Republican Governor Candidate Mastriano in 2022, since mail-in ballots were part of this election?

If algorithms are running on the in-person election day votes, would it be happening on the precinct voting machines in Chester County? Are the USB sticks from Voter Services that are preprogrammed for each precinct each election preloaded with votes or an algorithm? Would this algorithm keep the total number of voters who show up the same but shift votes around between candidates that no one would be able to see?

Where would mail-in ballot algorithms be run if they are occurring? Would this be happening at the central counting area in Chester County on the mail-in ballot tabulators? Are the USB sticks from Voter Services that are preprogrammed for each mail-in ballot tabulator preloaded with an algorithm? Would an algorithm there keep the total number of voters who voted the same but shift votes around between candidates that no one would be able to see?

Another important takeaway is doing this analysis finds precincts that do not match the pattern. If an algorithm was running, why didn’t the “yellow” precincts follow the pattern? Was something different going on at these precincts to change the vote total pattern? Should these precincts be asked about what went on there during this election? Note that precincts 565 Spring City 2, 050 Caln 2, 090 Coatesville 3, 100 Coatesville 4, and 110

Coatesville 4-2 don't follow the pattern in either the election day nor the mail-in ballot categories. What happened at these precincts that this outcome was achieved? What is going on in the Coatesville and surrounding area precincts in general, since they appear not matching the pattern in the final total outcome, the election day outcome and the mail-in outcome?

Now let's look at which Democratic candidate received the highest vote total in the 2022 General Election:

<u>CHESTER COUNTY PRECINCTS</u>	2022 HIGHEST PERFORMING DEMOCRAT

The Democratic Governor Candidate Josh Shapiro received the highest vote total in 224 of 230 precincts in Chester County. The precincts in yellow that do not follow the pattern again include the Coatesville precincts, a Valley N-2 precinct which is in the Coatesville area, and a Phoenixville and Willistown precinct.

Which precincts had the lowest/highest pattern, causing concern for vote swapping? See the chart below:

A total of 225 of 230 precincts have the lowest/highest pattern. For just the Governor race, the lowest/highest pattern is seen in 221 of 230 precincts, or 96% of all precincts.

How is it explained that 96% of all Chester County precincts gave the Republican Governor Candidate Mastriano the lowest amount of votes of all Republican candidates, while the Democratic Governor Candidate Shapiro received the highest amount of votes of all Democratic candidates?

Experts who have examined the system have found it rare for more than five percent of Republicans and Democrats to split their ticket when voting for candidates. For the top-ticket races, are we to believe Republicans favored other candidates more than their Governor candidates? An analysis done for the General Election of 2020 in [Allegheny County, PA](#) shows 8.8% of all voters splitting their ticket between parties when voting. This information is from [Cast Vote Records](#) obtained from the county. The analysis states, "Overall, 8.8% of voters who voted for one of the other [Republican] candidates did NOT vote for President Trump. This indicates that there is a 97.8% probability that the votes reported are not completely authentic." More information on this analysis can be seen [HERE](#). What has been happening in Chester County and the rest of Pennsylvania?

The same patterns unfolded all across Pennsylvania in 2014, 2018 and 2022. Many county election archives did not go as far back as 2014, but a good amount were found. Examples of counties that experienced the lowest/highest and low vote total patterns during past Governor elections include York, Bucks, Montgomery, Delaware, Lebanon, Centre, Cumberland, Westmoreland, Beaver, Butler, Lehigh, Tioga, Erie and Northampton County. It is entirely possible that many more counties in Pennsylvania experienced these patterns.

As mentioned, York County's following of the patterns was significant. Even though it has a history of being a strong Republican county, Gubernatorial candidates experienced even more suspicious results in York County than in Chester County. **Were just enough votes deducted off Republican candidates in strong Republican counties to keep them winning, yet not enough for people to notice and question the numbers during federal elections?** If this is indeed the case, could these redistributed votes then impact the final statewide vote totals for a particular candidate?

See examples of the patterns in other Pennsylvania counties on the following pages, starting with York County.

Please note that the lowest Republican vote total and highest Democrat vote total (lowest/highest pattern) are pointed out in the 2014 results, but for 2018 and 2022 the reader is left to see this fact for themselves without it being pointed out. Gubernatorial candidates are always circled when the lowest/highest pattern is present, while for comparison, the remaining candidates have boxes around them.

All precincts in York County gave Republican Governor candidate Tom Corbett the lowest number of votes out of all Republican candidates in 2014. As of now, York, Cumberland and Chester County are the only three counties found with all precincts having displayed this pattern in 2014. The Democratic Gubernatorial candidate Tom Wolf had the highest vote total in every precinct across York County except in the York City precincts. York City precincts had Democrat State Representative candidate Kevin Schreiber of the 95th district earning higher vote totals than Wolf. He ran unopposed.

The lowest/highest pattern is seen above in the above precinct report. To see the complete York County election archives from 2014, [CLICK HERE](#).

Some might assume Corbett received lower votes across York precincts because Wolf was from York County; however, the same pattern emerges in York again during 2018 and 2022, with two different Governor candidates:

Carroll Township	1,004	2,455	7

The lowest/highest pattern is seen in the above precinct report.

In 2022, York County once again displayed the same low vote total pattern for Republican Governor Candidate Doug Mastriano. **All but two precincts showed the pattern.** There was one precinct where US Senator Candidate Oz received one less vote than Mastriano, and another precinct where voters had to vote for two Congressional candidates. This split the vote totals in this precinct and the Congressional candidates received the lowest vote totals for that precinct. The remainder of York County precincts followed the prevailing pattern with Mastriano receiving the lowest vote totals.

To see the complete York County 2022 precinct results and observe the patterns, [CLICK HERE](#). Note that York County had a different election results display in 2022.

18th Legislative District Representative in the General Assembly Vote For: 1				
Bensalem Twp Lower East 5	5 A	Lamb, Jimmy	Democratic	427
Bensalem Twp Lower East 5	5 B	DiGirolamo, Gene	Republican	987

The lowest/highest pattern is seen in the above precinct report.

In 2018, The majority of Bucks County precincts gave Governor candidate Scott Wagner the lowest Republican vote total.

In the Bensalem Township precinct above, Democrats win the Governor and US Senate race, while Republicans win the Congressional and State Representative races. Was this because many votes were taken from Mastriano and Barletta and then given to their Democrat opponents? Why does Barletta seem to repeatedly have the second lowest vote totals? The difference in vote totals between Barletta and Wagner and the other three Republican candidates is significant. Why did York County Republicans not want to vote for their US Senator and Governor candidates? The same is seen with the Democrat candidates. Casey and Wolf's totals are significantly higher than the other Democrat candidates.

The lowest/highest pattern is seen in the above precinct report.

The same is witnessed for Delaware County in 2018 – the majority of municipalities experienced the lowest vote total pattern, this time with Republican Governor candidate Scott Wagner. Some municipalities had the lowest vote total go to US Senator Candidate Lou Barletta, or there was a tie between Wagner and Barletta.

Vote for not more than 1		
RYAN COSTELLO (REP)	379	63.91
MANAN TRIVEDI (DEM)	210	35.41
WRITE-IN.	4	.67

SENATOR IN THE GENERAL ASSEMBLY 48TH DISTRICT

Vote for not more than 1		
MIKE FOLMER (REP)	498	98.03
WRITE-IN.	10	1.97

REPRESENTATIVE IN THE GENERAL ASSEMBLY 101ST DISTRICT

Vote for not more than 1		
MAUREE GINGRICH (REP)	391	64.10
PATRICIA K. STEPHENS (DEM)	190	31.15
WRITE-IN.	29	4.75

In 2014, all Lebanon County precincts gave Tom Wolf the highest number of votes for all Democrat candidates. The majority of precincts gave Tom Corbett the lowest number of votes of all Republican candidates. See the results above from the 2nd Ward West precinct. The race for Representative in the General Assembly 102nd District had three people running, which broke up the vote totals, making all three of their scores generally lower. This disrupted the lowest vote total Republican Governor candidate pattern.

For the complete 2014 Lebanon County election archives, [CLICK HERE](#). The above precinct report shows the lowest/highest pattern.

Patrick Leyland (DEM)	235	24.95	227	8	0	0	0
WRITE-IN.	0		0	0	0	0	0
Total	942		918	24	0	0	0

The lowest/highest pattern is seen in the above precinct report.

The Republican Governor candidate lowest vote total pattern is seen in many 2014 Westmoreland County precincts, but not as many as others. It was noticed in the State Representative race for the 55th District that Republican candidate Brian Panichelle had less votes than Corbett, and the Democrat candidate Joseph Petrarca had higher votes than Wolf. It was also discovered that the State Representative candidates in the 58th and 33rd districts had votes that went against the pattern. This county was not a key county for the lowest vote total pattern, but it still was present.

To see the complete 2014 Westmoreland County election archives, [CLICK HERE](#).

Total	513		497	16	0	0	0

The lowest/highest pattern is seen in the above precinct report.

In 2018, Westmoreland County had many precincts with the Governor candidate receiving the lowest Republican vote total. Some precincts also showed flipping between Governor Candidate Wagner and the US Senator candidate Lou Barletta for the lowest vote total, or on some occasions they would tie. This is like Centre County.

WRITE-IN.	4	.82

The lowest/highest pattern is seen in the above precinct report.

In 2014 the Republican Governor lowest vote total pattern was also present in many Beaver County precincts, as shown above in Beaver Borough 1.

One result that was unique to many Beaver County precincts was how Corbett had the lowest Republican vote totals, and a Democrat State Representative candidate running unopposed (Robert Matzie) would obtain more votes than Tom Wolf.

WRITE-IN	1	.14

The lowest/highest pattern is seen in the above precinct report.

In 2018, Beaver County had many precincts gave Republican Governor candidate Scott Wagner the lowest Republican vote totals. There were also a number of precincts where US Senate Candidate Lou Barletta was the lowest performing Republican candidate, and also some precincts where Wagner and Barletta tied. This is similar to results in Centre and Westmoreland counties.

To see the complete 2018 Beaver County precinct results, [CLICK HERE](#).

The lowest/highest pattern is seen in the above precinct report.

In Tioga County 2014, many precincts followed the same Republican Governor candidate low vote total pattern. Above are the results from Bloss Township precinct. There were also many precincts that had low or matching scores for the 10th Congressional Republican candidate Marino. To see the complete Tioga County election archives for 2014, [CLICK HERE](#).

Tioga County is not shown for 2018 as the majority of their lowest Republican vote totals goes to US Senator Candidate Lou Barletta.

The lowest/highest pattern is seen in the above precinct report.

The Republican Governor candidate lowest vote total pattern appeared again throughout many precincts in Northampton County during 2022. On a number of occasions, Republican Candidate John Merhottein, who ran for Senator in the General Assembly 18th Senatorial District, received vote totals lower than Mastriano.

To see the complete 2022 Northampton County precinct results, [CLICK HERE](#)

With so many counties across the state of PA exhibiting the same patterns across multiple elections, citizens are demanding answers to the following questions:

- During the past 3 Gubernatorial races, were votes subtracted from Republican candidates and then added to Democratic candidates?
- Why did the Republican Governor and US Senate candidates almost always have the lowest vote totals?
- Are algorithms programmed into election USB sticks or voting machines ahead of election day?
- How could these patterns happen across counties when they all may have different brands of voting machines? (ES&S, Dominion, Hart InterCivic, etc.)
- How could these patterns happen from 2014 to 2022 in the same county when that county may have had different brands of voting machines with different types of software over that span of years?
- Who has control of Chester County's and other counties' Election Management System computers?
- Who controls/administers the election software updates in each County?
- Who validates that election machines in each county do not have unauthorized software on them?
- Who gets to witness that election machines do not have unauthorized software on them before each election?
- Are there weaknesses in our electronic systems that allow for anyone to access these systems?
- Do USB sticks have pre-set malware on them?
- Have votes been subtracted from Democratic candidates and added to Republican candidates in other past elections?
- Were deals made between both parties each year over who would win certain races?
- Would deals between parties explain why neither the Democrat nor Republican parties do much for election integrity in PA?

The patterns demonstrated in this report cannot be classified as "misinformation." The precinct result data contained here came directly from official government websites in Chester County and counties across the Commonwealth. To call them "misinformation" would be implying that Pennsylvania county governments are all posting false election results.

Pennsylvania citizens are issuing an alert to the people of Pennsylvania and across the USA: take it upon yourselves to go into your county election archives and analyze election results in all precincts. That is where discoveries will be made. Determine who had the highest and lowest total votes for each party. Pennsylvania citizens then need to ask for hand counting of all ballots [at the precincts](#) this November, and no more machine usage whatsoever. After a decade of alarming election vote total patterns, including in the [2016 and 2020 Presidential Elections](#), how can we trust any voting machines? Pennsylvania counties may use different brands of voting machines, yet the same patterns occur.

In addition to the 2014, 2018 and 2022 Gubernatorial races, the Republican lowest/highest and low vote total patterns were also discovered in other Chester County races over a decade of time. They are seen in the Chester County 2016 and 2020 Presidential, State Treasurer and Attorney General races, the 2015 Supreme Court races (2015 was the year Democrats took control over the PA State Supreme Court), and also in every Chester County Municipal election from 2013 to 2023 with School Directors and Judicial races. How is this explained? Is this all just natural? **To see the full reports on the Chester County Presidential races, Judicial races (Including the 2015 PA Supreme Court race) and School Director races over the last decade, go to <https://votepatterns.com>.**

CRITICAL PROACTIVE STEPS YOU CAN TAKE BEFORE THE CERTIFICATION OF THE NOVEMBER 2024 GENERAL ELECTION:

Please be peaceful, respectful and lawful when performing the following tasks:

1. **If you reside in Chester County, Pennsylvania please attend your local commissioner and board of elections meetings immediately and ask for answers to how these patterns are happening.** Attend each meeting until the November election. There are public comment periods during the meetings. In Chester County, each person gets 3 minutes to speak, other counties and states may vary. Dates and times of these meetings in Chester County are posted [HERE](#). They are generally on weekdays in the mid-morning. Contact your commissioners at their offices by phone and email. Ask for the elimination of all-voting machines this November and that all ballots, including mail-in ballots, are hand counted at the precincts. **Say NO to centralized hand counting done by Voter Services, even in an emergency.** Ask them to train all of their Judges of Elections, Majority Inspectors, Minority Inspectors and clerks (poll workers) how to hand count ballots before November. A helpful resource may be to review [25 Pa. Stat. § 3062](#) which addresses how ballots were counted in PA prior to voting machines. Additional resources are available [here](#) and [here](#).

CHESTER COUNTY COMMISSIONERS:

JOSH MAXWELL	610-344-6151
MARIAN MOSKOWITZ	610-344-6691
ERIC ROE	610-344-6031

2. **Do a lowest/highest analysis for both parties on the 2022 General Election to determine precincts where poll watchers should be placed for November 2024.** Get the 2022 precinct report from your county government website under the election results archive section. This might be found under an elections tab, voter services tab, etc. See which Republican candidate has the lowest vote total in each precinct, and which Democratic candidate has the highest vote total in each precinct. Then do the reverse. Which Democratic candidate has the highest vote total, and which Republican candidate has the lowest vote total throughout every precinct. **Poll watchers should go to any precincts that do not follow the patterns that appear in the analysis, and also any precincts that show tie races in the analysis (for example, two races both get the lowest vote total of all R candidates).**
3. **Take close-up pictures (in sections, top to bottom) and videos of all of the printed out voting machine tapes at the end of the night on election day at your precinct (after 8 p.m.). Make sure the photos and videos are clear and every race and their votes are clearly readable. For the videos, start at the top of the tape and work down to the bottom. Keep the video under one minute long.** They should be hung up on a door or in an area for the public to view at each precinct. PA Election Code Article XI-A, Section 1113-A (f) indicates that regarding the tapes, one such record shall be **publicly posted** at the district polling place. [HERE](#) is the [election code](#) you can print out and show if you have any issues. If you can get to other precincts and take pictures/videos of theirs, please do. **Also have mail-in ballot observers ask for printed out copies of the mail-in ballot tabulator reports after the batches are finished being counted.** If you cannot get a copy, write down all the races and their vote totals in a notebook. In Chester County, Take pictures of the reports (or your notes of the results) and make sure they are clearly readable, then upload the tapes and reports to <https://votepatterns.com>. Pictures and videos of tapes/reports from every precinct need to be obtained in case any issues arise that prevent the election night reporting websites from functioning or being able to give results. These tapes, videos and reports will be analyzed with the lowest vote total and highest vote total analysis for each party to see if any patterns appear. All precinct tapes/reports are needed so they can all be compared to each other. If you do not live in Chester County, find someone to organize where all of this information should be collected.
4. **If there are no issues with your county's internet website, and precinct reports are available, as soon as your county posts their election results on the internet on election night, print out and take pictures and videos of your precinct's results and every individual precinct's results that you can in the county. Make sure you get pictures and video of all the races' scores.** All precinct reports for the entire county need to be obtained as soon as possible. Have printer ink ready in your printer. Videos need to be under 1 minute long. In Chester County, upload pictures and videos of your online precinct report to <http://votepatterns.com>.
5. **Record how many votes each Republican and Democratic candidate won or lost their race by in each precinct.** Doing this showed clear patterns in previous elections. This also will show other races with patterns that might not originally

show up in the lowest/highest analysis, especially down-ballot races. Email your analysis of a Chester County precinct to info@votepatterns.com. You can also take pictures of your findings and upload them to <https://votepatterns.com>.

6. **Become a poll watcher at the most critical precincts in your county.** Be a poll watcher at a precinct that has not been following the patterns. Make sure you or others are there for the opening and closing of the precinct especially, but all day coverage is needed. Watch to make sure that no one is going into any back rooms or offices to make additional fraudulent ballots. Watch for bags or boxes going into other rooms. Ask to see the poll book at the opening of the day before voters arrive to make sure signatures are not already in them. Above all, make sure you follow your county's rules for poll watchers. If you are being blocked from accessing an area you believe you should be able to observe, ask a constable for assistance.

7. **Become a mail-in ballot observer.** Observe the transportation of them from the ballot intake area to the counting room if allowed. Watch for carts of ballots going in and out of side rooms they shouldn't be in. Stay until the very end of counting and ask to get a copy of or see the reports that come from the mail-in ballot tabulators. Take notes in a notebook of the race totals in the reports by batch. If a precinct's results are spread out in multiple batches, add the grand total up before taking a picture and uploading it. Take a picture/video of your notes, make sure it is clearly readable, and upload them to <https://votepatterns.com> if you live in Chester County.

8. **Vote in person, on election day. Do not vote by mail-in ballot.** Cast Vote Records from around the country show that early mail-in ballots are being manipulated. If there is cheating going on through voting machine manipulation, the one way to beat it is to have record turnout where everyone in the voter rolls is voting. Do not think that your vote is a waste of time due to cheating. It can overpower any cheat if enough people vote.

9. If you are a poll watcher at a precinct on election day, determine if the number of ballots handed out is tracked and, if so, find out and report that number at the end of the day. If the number of ballots given out is not being tracked, respectfully ask that they be counted as they are handed out to voters.

10. For poll watchers, **be on the lookout for complaints from voters who are told that they already voted via mail-in ballot.** Encourage any such voters to immediately register an identity theft claim with the local sheriff.

11. **It is becoming clear that the USB sticks need to be inspected by bipartisan members of the public before they are plugged into voting tabulators to make sure there are no preloaded ballots or unauthorized, additional software/malware etc. on them. The Election Management System also needs to be examined by a bipartisan group from the public to confirm no unauthorized software or hardware exists in it. What can be done so that there is a clear transparency as to what is on the county Election Management System and the USB sticks that go to the tabulators, immediately prior to each election? Who programs your county's USB sticks and voting machines before each election? Who runs the Election Management System? How can the public know there is not unauthorized software/hardware/malware on them? Please ask your local county commissioners for the answers to these questions.**

The actions suggested above are intended to help poll watchers, observers of mail-in ballot tabulation, and the public be more effective at identifying potential irregularities during the voting and tabulation processes. Reading or following these suggestions will not create any obligation to the reader by the author or to the author by the reader. Every poll watcher, mail-in ballot observer or other person is responsible for their own behavior. These suggestions are not legal advice and should not be construed to be legal advice. You may want to get advice from an attorney before taking these or any other action. Every person following these suggestions or taking other actions does so at their own risk. Be certain to follow local and state laws when serving as a poll worker, poll watcher, mail-in ballot observer, or an observing member of the public. Please be peaceful and respectful in all interactions with others.

Simplified:

1. Do lowest/highest analysis on 2022 to determine precincts where poll watchers should be placed.
2. Get pictures and videos of your precinct voting machine tapes. Upload them to: <https://votepatterns.com>
3. Get pictures and videos of the mail-in ballot tabulator reports. Upload them to: <https://votepatterns.com>
4. Get pictures and videos of your online precinct report on your county election results website. Upload them to: <https://votepatterns.com>
5. Record how many votes each Republican candidate won or lost their race by in each precinct. You can also do it for Democratic candidates. Doing this showed clear patterns in previous elections. Email your results to info@votepatterns.com
6. Sign up to be a poll watcher or mail-in ballot observer.
7. Vote on election day. Do not vote by mail-in ballot.
8. If you find significant patterns and you are not in Chester County, report your findings to any candidates that are affected.
9. Get to your county Commissioner and Board of Elections meetings and ask for answers to these patterns and for them to eliminate voting machines this November in favor of counting all types of paper ballots by hand, at the precincts. Make sure they are ready to switch to hand counting should any issues occur.
