

## **REPORT ALERT:**

**2013 - 2023 CHESTER COUNTY JUDGE RACES - SUSPICIOUS PATTERNS IDENTIFIED**

**HAS VOTE SWAPPING BEEN FOUND?**

A GRASSROOTS INVESTIGATION

**\*\*Disclaimer: Many volunteers recorded, counted and analyzed what they observed in precinct election results across Chester County, and other counties across Pennsylvania. Though inspected several times, the opportunity exists for human error to be found in what was recorded in any of the charts shown, numbers counted, statements made, etc. in this report. Due to this, it is asked that all authority be placed upon the official precinct and cumulative election results released by the Pennsylvania counties. They are linked to this report. They are official and speak for themselves. This report seeks to shine a light onto what volunteers have observed across Chester County and other Pennsylvania counties in over a decade of election results.**

**\*\*It is believed that all candidates featured have done nothing wrong. They are considered innocent as they do not program nor operate voting machines.** The question that prevails is who was programming the voting machines for each of the elections shown, and do they know if any unauthorized software was in use?

## **JUDGE REPORT PRELUDE**

Let's imagine there is going to be an election – one where voters will vote for the judges of their Supreme Court, Superior Court, Court of Common Pleas and Commissioner candidates. Around 102 Republican voters and 88 Democrat voters show up to vote. After the voters go to their precincts to vote, eventually the results are posted into a precinct report.

As you can see, the Republicans won all races, and their vote totals were pretty close in each race. Now imagine a bad actor wanted to change the outcome, to where the Democratic Superior Court Candidate would win instead of the Republican.

The bad actor installs secret unauthorized software into the precinct voting machines that automatically removes 20 votes from Republican Superior Court Candidate Joe, and adds them to Democratic Candidate Harry's total. What might this look like?

Now that the secret unauthorized software was applied to the vote totals, we see Republican Candidate Joe's score reduced by 20 votes, and Democratic Candidate Harry's score increased by 20 votes.

Joe is the only Republican candidate that loses their race on the ballot in this precinct.

What else is noticed?

Republican Superior Court Candidate Joe now has the lowest vote total of all Republican candidates on the ballot in this precinct. His vote total is 82, which is lower than all other Republican candidates' totals.

Also notice that the Democratic Candidate Harry now has the highest vote total of all the Democratic candidates in this precinct. His vote total is 108, which is higher than all the other Democratic candidates' totals.

Now take what you see in this imaginative demonstration, and think about it when you read about the “lowest vote total” pattern and “lowest/highest” pattern being found in all General elections from 2013 to 2023 in Chester County, PA for specific Republican candidates. What conclusions do you draw? Could vote total manipulation be a real possibility, or not at all?

What if 20 votes specifically were not programmed to be subtracted from the Republican Superior Court candidate, but instead, were some percentage of the total votes that a computer algorithm figures out? What if this algorithm is set so that each precinct removes a specific amount of votes from the Republican Superior Court candidate which then, when added up, results in a “pre-set” or “pre-determined” final result number?

Could it be possible that multiple races would have their votes manipulated? In the middle of the following report you will notice that a separation occurs between the Pennsylvania state races and the county races. An important question then appears as to whether separate algorithms might be happening in the state and county races.

For right now, to help keep this illustration easy to understand, the Superior Court race is the only race we’ll focus on. Keep in mind how the Republican Superior Court Candidate Joe ended up with the lowest Republican vote total, and how Democratic Superior Court Candidate Harry ended up with the highest vote total. The concept of *how* this could have happened is the point of this imaginary illustration.

#### **DESCRIPTION OF TWO PATTERNS FOUND:**

1. **LOWEST/HIGHEST** – This pattern shows a specific candidate from one party having the lowest vote total of all candidates on the ballot in their same party, while their opponent in the same race from the other party has the highest vote total of all candidates in their party. This is seen happening throughout all or many precincts in a county. This causes concern that “vote swapping” is occurring.
2. **LOWEST VOTE TOTAL** – This pattern shows the same candidate from one party having the lowest amount of votes of all candidates on the ballot in their same party, throughout all or many precincts in a county.

**\*\*Disclaimer: Many volunteers recorded, counted and analyzed what they observed in precinct election results across Chester County, and other counties across Pennsylvania. Though inspected several times, the opportunity exists for human error to be found in what was recorded in any of the charts shown, numbers counted, statements made, etc. in this report. The question that prevails is who was programming the voting machines for each of the elections shown, and do they know if any unauthorized software was in use?**

**2013 - 2023 CHESTER COUNTY JUDGE RACES - SUSPICIOUS PATTERNS IDENTIFIED**

An investigation into 11 years of Chester County, Pennsylvania precinct election results has uncovered shocking patterns in Republican candidate vote totals, both in the county and across the Commonwealth. These patterns are observed in every general election since 2013 in Chester County.

In every municipal election from 2013 - 2023, the precinct reports show Republican Judicial Candidates repeatedly earning the lowest vote totals of all the Republican candidates on the ballot, throughout a large number of precincts in Chester County. They also show occurrences of a lowest/highest pattern, which causes concerns of vote swapping.

Why would Republicans from so many precincts not want to vote for their judicial candidates on the top of the ballot each election? Especially after 2020 when many Republicans became more concerned about issues going on in the justice system? This seemingly unnatural consistency throughout so many precincts year after year causes great concern from Pennsylvania citizens that these races may have been targeted for fraud.

Starting with **2013**, though not as severe as later years, an unexpected occurrence appears between two Court of Common Pleas Candidates – Republican Jeffrey Sommer and Democrat Julia Malloy-Good. A Total of 97 precincts give Sommer the lowest vote total of all Republican candidates on the ballot. Within several of these specific precincts, a lowest/highest pattern is found where Sommer has the lowest Republican total and Malloy-Good has the highest Democratic total. This causes concern of vote swapping. In total, Sommer has one of the bottom four lowest vote totals in 191/226 precincts. The bottom four Republican vote totals were studied in 2013 once it was discovered that four Republican School Director candidates were repeatedly falling among the bottom four vote totals in other precincts.

In each of the above precincts, it is noticed that Republican Court of Common Pleas candidate Sommer has the lowest vote total of all Republican candidates on the ballot, and the Democratic Court of Common Pleas candidate Malloy-Good has the highest vote total of all Democratic candidates on the ballot. Due to this same pattern occurring repeatedly in the same races, in multiple election years, it causes great concern. Were votes being removed from Sommer and added on to Malloy-Good? Does this explain why throughout many precincts, this pattern was seen?

Since it was a vote-for-two race, why did Republicans not want to vote for both of their candidates consistently? Did some Republicans favor the Democratic candidate Malloy-Good over Sommer? Or was something else at play? Sommer ended up still winning the second judge seat in the Court of Common Pleas race in 2013. If an algorithm was applied, was it not strong enough? Or was this pattern just a natural occurrence?

Below is a chart showing which candidates received the lowest four vote totals in 2013. The pattern shown in the above three precincts is seen in many precincts that gave Sommer the absolute lowest vote total. Sommer's name is highlighted in brown. Note the number of precincts that have Republican school director candidates in the bottom totals also. See the color key below to help identify Republican candidates on the chart.

This chart shows that Republican School Director candidates joined Sommer in having the lowest vote totals across most precincts in 2013. Were both the Republican School Director and Court of Common Pleas candidates affected by algorithms? Did Republicans not want to vote for them in 2013? Across 2013 - 2023, many precincts were seen showing one out of two Republican judicial candidates losing their races.

Another discovery is that there were 25 “Republican majority” precincts where Sommer lost his 2013 race while co-candidate Carmody and most or all of the other Republican candidates won their races. A Republican majority precinct simply means a precinct where the Republicans won the majority of races on the ballot, but not all in the 2013 Municipal Election. Why did Sommer lose his race while most of the other Republicans won? Republican School Director races were also lost in many of the same Republican precincts. How is this explained? Could it be that enough votes were removed from their totals that it caused these candidates to lose while the others won? Or was this just a natural occurrence?

The Republican majority precincts where the Court of Common Pleas losses occurred are below. The writing inside the pink cells are the races that Republicans **lost** in an otherwise conservative-leaning precinct in 2013.

# 2015

In 2015, startling patterns show the same Republican Supreme Court judicial candidates repeatedly earning some of the lowest vote totals out of all the Republican candidates on the ballot. This pattern occurred in 223 out of 227 Chester County precincts. Democrats went on to take majority control of the Pennsylvania Supreme Court after this election.

Republican Supreme Court candidates Anne Covey and Mike George were among the bottom three vote totals in 223 out of 227 precincts. All three Republican Supreme Court candidates (Covey, George and Judy Olson) were among the bottom three Republican vote totals in 126 out of 227 precincts. The bottom three vote totals were studied due to there being three candidates from each party in this race.

Why would Republicans from nearly every precinct not want to vote for Republican Supreme Court candidates? Could votes have been taken away from Republican Supreme Court candidates and given to their Democrat opponents? The lowest/highest pattern was found upon further research of dividing up the races into groups of state and county races. (County races include the county-wide races and races specific to certain precincts like school directors, township supervisors, etc.) Could just enough votes have been taken away from Republican Supreme Court candidates, in strong Republican precincts, to keep them winning without anyone noticing they have lower vote totals than all of their fellow candidates?

Atglen has a history of being a very strong Republican precinct in Chester County, based on its election outcomes. However, all three Republican Supreme Court candidates at the top of the ballot received the lowest vote totals out of all Republican candidates in this precinct in 2015. While the Republican Supreme Court candidates still won their races here, their vote totals are lower than all the other Republican candidates.

This was a repeated occurrence throughout strong Republican Chester County precincts. Was an algorithm at play to take votes off Republican candidates in strong Republican precincts, but not enough to let them lose their races? Would no one notice the lower amount of votes? How much of an effect would that have on the final outcome of the Supreme Court election in Chester County?

What does this mean now that the lowest/highest pattern has appeared once the races were separated into state and county races? Are there separate algorithms being run, one for the state candidates, and one for the county candidates? If the votes are being altered, who is doing it? Is all of this natural? Were votes removed from Republican Supreme Court Candidate Anne Covey and added to opponent Kevin Dougherty? Were votes Removed from Republican County Commissioner Candidate Michelle Kichline and added to opponent Kathi Cozzone? Or was this outcome natural?

The lowest vote total and lowest/highest patterns also emerge in “Democrat-winning” precincts in the state races. See an example below in the Valley North precinct:

Lowest vote total of all Republican candidates on the ballot in this precinct in the county races.

\*The lowest/highest pattern has not yet been found in the county races in this precinct. Could this be due to multiple races having an algorithm affect their scores? The highest vote total of all Democratic candidates in the county races is Julia Malloy-Good, who ran for Court of Common Pleas. Further grouping of county races is needed to see if the pattern will appear.

To see this Chester County precinct report, [CLICK HERE](#).

Based on the lowest/highest pattern, the following questions need to be answered: Were votes removed from Republican Supreme Court Candidate Mike George and added to Democratic opponent Kevin Dougherty's total? Or were these natural outcomes?

Below is a chart showing which precincts gave 2015 Republican Supreme Candidates Anne Covey, Mike George and Judy Olson the lowest vote totals of all Republican candidates on the ballot in Chester County. Also note Republican School Director candidates in green.

What was going on with Chester County voters not wanting to vote for their Republican Supreme Court candidates? Why are so many Republican School Director candidates again among the lowest vote totals?

Another discovery was that the Republican Supreme Court candidates also received the lowest final cumulative vote totals in the state and county races compared to their fellow Republican candidates. Not only that, but while their fellow Republican candidates won every other race in 2015, two of the three Republican Supreme Court candidates LOST their races.

See the 2015 Chester County cumulative summary report for those races:

All three Republican Supreme Court candidates receive the lowest vote totals in both the state and county races. Two of their races are LOST.

\*Notice Republicans win EVERY race except two of the three Justice of the Supreme Court judge seats.

Notice the Republican District Attorney, Sheriff, Prothonotary, Register of Wills and Recorder of Deeds candidates all have higher vote totals than the top-of-the-ballot Republican candidates above them.

To see the 2015 Municipal Election Summary Report in Chester County, [CLICK HERE](#).

The above results also show Republican Supreme Court, Superior Court, Commonwealth Court, Court of Common Pleas and County Commissioner candidates earning lower votes than all Republicans in remaining row office races. Are Republican votes being removed off top-of-the-ballot candidates and added to their Democrat challengers? If true, would it be hard to notice in municipal election precinct reports, while having a major impact

on final totals? Municipal elections can have many more candidates on the ballot, and multiple candidates running for the same race. This can make vote total patterns much more difficult to analyze in municipal elections than in federal elections.

It was also found in election summary reports across the Commonwealth that Beaver, Washington, Bucks, Montgomery, Delaware, Northampton, Allegheny, Lehigh, Westmoreland, York and Centre counties all show their Republican Supreme Court candidates earning among the lowest vote totals of all Republican candidates in state and county races. This information can be seen in the 2015 PA Supreme Court report. More PA counties may also follow this pattern; however, they have not yet been researched.

A final discovery was 63 “Republican majority” precincts had Republican Supreme Court candidates lose their races, while most or all of the other Republican candidates won their races. A Republican majority precinct simply means a precinct where the Republicans won the majority of races on the ballot, but not all in the 2015 Municipal Election. Why did the Supreme Court candidates lose their races while most or all of the other Republicans won? Was this just a natural occurrence?

The Republican majority precincts where the Republican Supreme Court losses were seen are below. The writing inside the pink cells are the races that Republicans **lost** in an otherwise conservative-leaning precinct in 2015.

While reviewing all of the Republican Supreme Court candidate losses, it was discovered other races are showing patterns as well. This includes one of two Commissioner candidates, the Superior Court candidate, School Director candidates and the Court of Common Pleas candidate.

## 2017

In 2017, the bottom four Republican vote totals were studied due to Judicial candidates consistently finishing among the bottom four vote totals. The most concerning race was that of Republican Superior Court Candidate Wade Kagarise who was among the bottom four vote totals in 226/228 precincts. He had the absolute lowest Republican vote total in 161/228 precincts. Kagarise was not the last listed Republican Superior Court candidate on the ballot in this year - instead it was fellow candidate Mary Murray, according to precinct reports.

Meanwhile, other Republican judicial candidates also finished among the bottom four vote totals: Commonwealth Court candidate Paul Lalley in 196/228 precincts; Superior Court Candidate Craig Stedman in 182/228 precincts; Superior Court Candidate Emil Giordano in 136/228 precincts. Superior Court Candidate Mary Murray appears among the third and fourth lowest vote totals, but not in the first and second lowest.

The lowest/highest pattern shows up when races are separated into state and county groups, like in precinct 360 East Marlborough West:

Note that there are some cells highlighted in yellow. These cells show the Republican Township Supervisor candidate Raffi Terzian falling among the lowest vote totals, along with the Republican Judicial candidates. He is currently the Chester County GOP Chairman. His co-candidate for Township Supervisor, Robin Bond, is also found among the lowest vote totals.

An additional discovery was made which is described below:

In 2017 there were 26 “Republican majority” precincts where the Republican Superior Court candidates lost their races while most or all of the other Republican candidates won their races. A Republican majority precinct simply means a precinct where the Republicans won the majority of races on the ballot, but not all in the 2017 Municipal Election. Why did the Superior Court candidates lose their races while most of the other Republicans won? Was this just a natural occurrence?

The Republican majority precincts where the Republican Superior Court losses were seen are below. The writing inside the pink cells are the races that Republicans **lost** in an otherwise conservative-leaning precinct in 2017.

It was noticed that once again, not only are the Republican Superior Court candidates consistently losing their races, but other Republicans are losing races as well. Examples include the Commonwealth Court candidate, Coroner, Controller, School Directors etc.

The one out of four most likely represent the precincts where Superior Court Candidate Wade Kagarise got the lowest Republican vote total. Keep in mind he was not the last candidate listed out of the four Republicans running. The question that needs to be answered is, if an algorithm was running, were so many votes removed from Kagarise that it caused him to end up losing in many Republican precincts? Could the same have happened to all of these other Republican candidates that are seen consistently losing in Republican precincts?

One last observation for 2017 is Republican Supreme Court Candidate Sallie Mundy received the highest vote total of all Republican candidates in the state and county races. She also ended up winning her race state-wide. This is a total reversal of what happened in 2015, when the three Republican Supreme Court candidates received the three lowest vote totals of all Republican candidates on the ballot in Chester County. See 2017's results:

This is the highest vote total of any Republican state or county-wide candidate in Chester County. While every other Republican candidate lost by thousands of votes, Mundy lost by a much smaller margin.

\*In a total reversal of 2015 Chester County cumulative results, where Republicans **won all races except two of the three Republican Supreme Court seats**, now in 2017 Republicans **lose every state and county-wide race on the ballot**. How did they go from winning every race except one to losing all races in just one Municipal election cycle?

To see the above 2017 Chester County summary report, [CLICK HERE](#).

While the Democrats now held the majority on the PA Supreme Court, Mundy's 2017 win meant a Republican justice originally nominated by Democrat Governor Tom Wolf won a full term with the PA Supreme Court. Was her win part of a deal made between Democrats and Republicans, or was this just a natural outcome? How do you explain all the loss Republicans suffered in the 2017 elections yet explain Mundy's overall win?

# 2019

In 2019, the bottom three Republican vote totals were studied and recorded due to two specific Judicial and School Director candidates standing out in the bottom three Republican totals. In some instances, school directors fell into the bottom four vote totals. When this occurred it also was recorded.

The two Judicial candidates seen in the bottom vote totals were Republican Superior Court Candidate Christylee Peck and Republican Court of Common Pleas Candidate Charles Gaza. Peck was seen in the bottom three vote totals in 197/228 precincts. Gaza was seen in the bottom three vote totals in 194/228 precincts.

A precinct example that shows the lowest/highest pattern is 400 Newlin:

Based on the lowest/highest pattern emerging, the following questions need to be answered: Were votes removed from Republican Superior Court Candidate Peck and added to Democratic opponent McCaffery's total? Were votes removed from Republican Sheriff Candidate Fitzgerald and added onto Democratic opponent Maddox's total? Or were these outcomes natural? Did the same occur with Republican Court of Common Pleas Candidate Gaza with Democratic opponent Sondergaard? When looking at their two totals, would it make more sense for their scores to be switched? This would make their vote totals closer to what their co-candidates have.

A precinct showing Republican Candidate Christylee Peck and Court of Common Pleas Candidate Charles Gaza appearing in the lowest/highest pattern is below. See 800 Willistown South 1:

Remaining judicial retention questions are not shown. To see the above precinct report, [CLICK HERE](#).

Based on the lowest/highest pattern, the following questions need answered: Were votes removed from Republican Superior Court Candidate Peck and added onto Democratic opponent Green-Hawkins' total? Did the same occur with Republican Court of Common Pleas Candidate Gaza with Democratic opponent Sondergaard? Were these outcomes natural?

Below is the chart that shows which Republican candidates got the lowest vote totals in each precinct:

Republican Supervisor candidate Raffi Terzian once again has the lowest vote total in two precincts. Could his vote totals have been manipulated to lose since they fall before Gaza and Peck?

Precincts 30 West Bradford 2, 45 Caln 1, 61 West Caln 2, 65 Charlestown and 70 Coatesville 1 were all missing on the [election returns website](#) for Chester County. Therefore, these precincts could not be analyzed.

There were also 21 “Republican majority” precincts in 2019 where one out of two Republican Superior Court and Court of Common Pleas candidates lost their races while most of the other Republican candidates won their races. A Republican majority precinct simply means a precinct where the Republicans won the majority of races in 2019, but not all of them. Why did the Superior Court and Court of Common Pleas candidates lose their races while most of the other Republicans won? Was this just a natural occurrence?

The Republican majority precincts where the Republican Superior Court and Court of Common Pleas candidates lost are shown below. The writing inside the pink cells are the races that Republicans **lost** in an otherwise conservative-leaning precinct in 2019.

# 2021

In 2021, the bottom four Republican vote totals were analyzed due to four specific Judicial and School Director candidates standing out in the bottom four Republican totals.

The Judicial races seen in the bottom four vote totals were Republican Commonwealth Court Candidates Drew Crompton and Stacy Wallace, along with Court of Common Pleas Candidates Lou Mincarelli and PJ Redmond. Crompton was among the bottom four vote totals in 200/230 precincts, Wallace in 145/230 precincts, Mincarelli in 175/230 precincts, and Redmond in 154/230 precincts. Except for one precinct, Republican Supreme Court Candidate Kevin Brobson showed up in the third and fourth lowest vote totals, but not the first and second lowest.

The Commonwealth Court and the Court of Common Pleas races were each a vote-for-two race. Republicans and Democrats each had two candidates running in these races. This means that for some reason, many Republican voters did not want to vote for any of their Commonwealth Court or Court of Common Pleas candidates. Why would this be? Why would Republican candidates from the top of the ballot earn the lowest amount of votes from voters? Was this a natural outcome?

The first precinct displaying the lowest/highest pattern is 15 Birmingham 2:

## Judicial Retention Question - John T. Bender

Vote For 1

Remaining Judicial retention questions are not shown. To see the above precinct report, [CLICK HERE](#).

After spotting the above lowest/highest pattern, the following questions arise: Were votes removed from Republican Commonwealth Court Candidate Crompton and given to his Democratic opponent Dumas? Likewise, were votes removed from Republican Court of Common Pleas Candidate Mincarelli and added to his Democratic opponent Rovito?

Following the discovery of the lowest/highest pattern in the above 2021 precinct result, it was then noticed that the lowest/highest pattern was not seen again in the total votes for judges, but instead in either the "Election Day" votes or "Mail-In" votes in certain precincts.

One major change was the introduction of mail in ballots in 2020. The 2021 Municipal Election in Chester County became the first municipal election to have mail-in ballots. Questions come to mind: Could algorithms have been run on the front side of the election, causing the original lowest/highest pattern to appear in the Election Day votes? Could mail-in ballot votes also have algorithms applied via the tabulators, causing the pattern in some Mail-In totals? Since the Republican lowest vote total patterns are still present, but not the highest Democrat pattern, could this mean mail-in ballots were submitted to affect Democrat races only and not Republican races?

After spotting the above lowest/highest pattern, the following questions arise: Were votes removed from Republican Commonwealth Court Candidate Crompton and given to his Democratic opponent Dumas?

The original low vote total patterns still were present in the total votes (Election Day plus Mail-In) with the four Judicial candidates and School Directors. Taking a look at the chart that shows which Republicans received the lowest vote totals, you can see the consistency in which these candidates receive the lowest votes.

Now that the low vote total patterns can be seen across the precincts of Chester County, there is no question that something seems strange about the Judicial and School Director candidates receiving so many of them, as was the case in previous years.

Could there be a way to see an algorithm running in election results? The Township Supervisor race in this precinct gave the Republican candidate the highest vote total compared to all other Republican candidates who had a Democrat challenger, including the judge races. Also, the Democratic township supervisor opponent has the lowest vote total of all Democratic candidates in the county races. When comparing the Township Supervisor race totals to all the other race totals, a question arises: Could the comparison show an algorithm at work? What if the real Republican number was 536 votes for Supreme Court?

$$\begin{array}{r}
 536 \quad 536 \quad 403 \\
 - 453 \quad - 83 \quad + 83 \\
 \hline
 83 \quad 453 \quad 486
 \end{array}$$

Notice how if you subtract 83 votes from 536 you get 453, which is the Republican Supreme Court total. If you add 83 votes to the 403 Township Supervisor Democrat total, you get 486. Could the real vote totals for the Supreme Court have been DEM 403 and REP 536 or something close to this? Could 83 votes have been subtracted from the Republican total, and added to the Democrat total? Or at minimum, could this be showing some type of algorithm removing and adding votes? What is shown is that if the vote total numbers were similar to the Township Supervisor numbers, if you delete a specific number from the Republican total and add it to the Democrat total, it equals what is posted as the Supreme Court numbers. See another example below:

### Township Supervisor W Bradford Township

If you subtract 54 votes from 540 you get 486, which is the Republican Supreme Court total. If you add 54 votes to the 403 Township supervisor Democrat total, you get 457. Could the real vote totals for the Supreme Court have been DEM 457 and REP 586 or something close to this? Could 54 votes have been subtracted from the Republican

total, and added to the Democrat total? Or at minimum, could this be showing some type of algorithm removing and adding votes? See a last example below:

 \end{array}$$

By adjusting the Township Supervisor Republican or Democrat number or both by a slight amount, there are ways to subtract and add the same number and achieve the outcome the Clerk of Courts race had. The ability to do this makes one wonder about the validity of the totals shown in each race.

A final example, precinct 558 Schuylkill 4, shows the low vote totals for the Republican Judicial candidates:

A final discovery made for 2021 were 19 “Republican majority” precincts where one out of two Republican Commonwealth Court and Court of Common Pleas candidates lost their races (along with the Supreme Court candidate many times), while most of the other Republican candidates won their races. Two extra Republican precincts did not vote for their Supreme Court candidates. A Republican majority precinct simply means a precinct where Republicans won the majority of races on the ballot, but not all during the 2021 Municipal Election. Why did the Superior Court and Court of Common Pleas candidates lose their races while their co-candidates and most of the other Republicans won? Was this just a natural occurrence?

The Republican majority precincts where the Republican Commonwealth Court and Court of Common Pleas candidates lost are shown below. The writing inside the pink cells indicates the races that Republicans **lost** in an otherwise conservative-leaning precinct in 2021.

The question again remains: Why are Republicans not voting for their Judicial candidates? Especially after 2020 when more Republican voters started to become concerned with the justice system?

Why does each precinct above have similar races that were lost? Why don't Republicans consistently want to vote for their School Directors, Township Supervisors, and other candidates?

## 2023

In 2023, the bottom four Republican candidate vote totals were analyzed due to four specific Judicial, School Director and Commissioner candidates standing out among the bottom four Republican totals.

The Republican Judicial candidates who finished among the bottom four vote totals were Superior Court Candidate Harry Smail Jr. along with Court of Common Please Candidates Dave Black, Andy Rongaus and Don Kohler. Smail Jr. finished among the bottom four vote totals in 170/230 precincts, Black in 168/230 precincts, Rongaus in 155/230 precincts, and Kohler in 137/230 precincts. Republican Court of Common Pleas Candidate Lou Mincarelli appeared among the third and fourth lowest vote totals, but not the first and second lowest.

The biggest surprise however in 2023 was Republican Commissioner Candidate David Sommers finishing in the bottom four vote totals more than any of the Judicial candidates. Sommers appeared in the bottom four totals in 174/230 precincts, which is 75.65% of all precincts.

Commissioner Candidate Sommers and Superior Court Candidate Smail Jr. each had the absolute lowest vote total of all Republican candidates in 50 precincts. Note they are a state and county race.

The lowest/highest pattern is seen for the judges in some precincts in the Election Day votes or the Mail In votes. An interesting observation is seen in the Township Supervisor races for Republicans – with several precincts showing them with the highest number of votes of all Republican candidates. Additionally, Republican lowest vote total patterns are still seen in the total votes for the judges.

As seen in some 2021 precincts, the Township Supervisor race once again has the highest Republican vote total than any other race in the precinct. When this was researched more, it was found that besides one Republican precinct that came very close to leaning Democrat, all the other remaining Republican majority precincts never had a loss in the Township Supervisor race. When some Democrat majority precincts were studied, it was noticed that the Democrat Township Supervisor candidates lost in several of them. This is very interesting. Could this mean that the Township Supervisor Republican candidates across several Chester County precincts did not have their vote totals manipulated? Or did something else happen?

Below are examples of Democrat majority precincts where Democrat Township Supervisor candidates lost. Some of these precincts had Democrats winning every race except the Township Supervisor. The writing inside the blue cells are the races that Democrats **lost** in an otherwise liberal-leaning precinct in 2023.

Superior Court Judicial Retention Question - Jack Panella

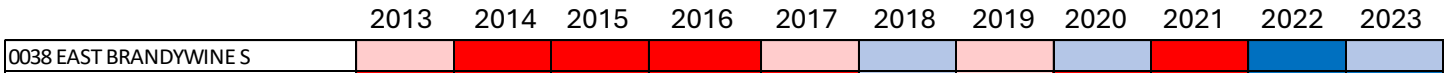

Vote For 1

Lowest vote total of all Democratic candidates on the ballot in this precinct in the county races and all races. With this re-emergence of the lowest/highest pattern, could the township supervisor races not have been affected by mail in ballot votes, but instead just had an algorithm running at the precincts?

Highest vote total of all Republican candidates in this precinct for all races. This is the ONLY race Republicans won in this precinct. Could this number of votes be the true number, or an algorithm at play?

Remaining judge retention questions are not shown. To see the above precinct report, [CLICK HERE](#).

Note that in addition to Republican Commissioner Candidate David Sommers, three Republican Court of Common Pleas candidates finished among the lowest four vote totals. The fifth lowest vote total was Republican Superior Court Candidate Harry Smail Jr. How is this explained? Why did Republicans in East Brandywine South precinct not want to vote for their Judicial candidates? East Brandywine's general election history was investigated further, and this is what was discovered:

How is it explained that 38 East Brandywine South was Republican up until 2018, went Democrat in 2018, then turned back Republican in 2019, then went Democrat in 2020, then back strong Republican in 2021, then strong Democrat in 2022 and majority Democrat in 2023?

Taking a look at their [2018 results](#), the year this precinct changed to Democrat, the following was noticed:

Republicans lose this race by 228 votes.

Republicans lose this race by 304 votes.

Republicans lose this race by 131 votes.

Republicans lose this race by 10 votes.

Republicans **win** this race by 1 vote.

Why did Republicans stop losing as many votes the further down the ballot they went? Why would they not vote the top of the ballot candidates, but would vote for the bottom of the ballot candidates? This is similar to Republicans not voting for the top of the ballot Judicial candidates in 2023 in this precinct. Is something going on with vote total manipulation in East Brandywine South? Or are these vote totals natural? Do Republican candidates' win and loss margins need to be studied more in each precinct?

The last precinct example for 2023 is 235 West Fallowfield. The lowest/highest pattern is seen in several places:

Win margin +164

\*For calculating the win margins in races with multiple candidates, each candidate was compared to their corresponding opponent. However, for the Superior Court race, Smail Jr. is compared to Beck, and Battista to Lane. This was a test to see if the margins match or come near other scores, which they did.

Highest vote total of all Democratic candidates on the ballot in this precinct in the state races (Election Day).

A final observation is the amount of votes that the Republican Judicial candidates (and other races) lost by is close to the number of registrations that were added since mail-in ballots were introduced.

In the above election results from the Chester County election results [website](#), the following numbers stand out. In 2019, prior to mail-in ballots, the total ballots cast was 141,061. In 2023, after mail-in ballots, the total ballots cast was 161,032. This is almost exactly a 20,000-vote increase. Note the difference in turnout between 2019 and 2021(+3,378), and the large jump in turnout from 2021 to 2023 (+16,593).

In 2019, prior to mail-in ballots, the number of registered voters in Chester County is 351,925. In 2021, after mail-in ballots, the number of registered voters jumps to 371,980. This is almost exactly a 20,000 registration increase. In 2023, this number increased by another 5,779 registrations. Could turnout and registration numbers be manipulated, or are these differences of 20,000 in both turnout and registrations for municipal elections natural?

An interesting observation is that the change in registrations between 2019 (prior to mail in ballots) and 2023 (after mail in ballots) is close to the amount of votes the Democrats won by in many races in 2023. The total number of the increase in registrations from 2019 – 2023 is 25,834.

The calculated average amount of votes Democrats won by in the below scenario is 23,100 votes per race.

See the example scenario showing the amount of votes Democrats won their races by against their Republican opponents below. The order of the races has been changed due to showing the scenario win margins.

Republican Supreme Court Candidate Carolyn Carluccio's scores have been kept separate of the others, as according to Audit the Vote PA, [election night reporting data shows hundreds of thousands of votes being deleted off of her total](#). If this occurred, were extra votes were taken off her score and added to her opponent in Chester County? Was this outcome natural?

**+27,979 VOTES**

In 2021, Democrats in Chester County won their races by roughly [4,000 to 10,000 votes per race](#). How is it explained that in the very next municipal election they win their races by roughly 20,000 to 28,000 votes?

Are the 20 – 28K votes that made the difference in the 2023 elections all mail-in ballots? Are the people of whom mail-in ballots come from in Chester County all legitimate, or could thousands of them be fraudulent or from phantom voters? A total of 43,750 mail-in ballots came in for the 2023 election. Are they all authentic? Could authentic mail-in ballot votes have been manipulated to meet a pre-set goal?

It is clear that across a decade of Chester County precinct results, Republican Judicial candidates are consistently earning the lowest vote totals of all Republican candidates. How can this be explained?

As this was seen in other races over the years - the 2014, 2018 and 2022 Governor races (most profound), the 2013 to 2023 School Director races, and the 2016 and 2020 Presidential, State Treasurer and Attorney General races - a hard look needs to be taken immediately into what is going on in Chester County elections. **You can read the reports on the Presidential, Governor and School Director races at <https://votepatterns.com>.**

Due to low vote totals being seen in other specific Republican races over the years, a hard look needs to be taken immediately into what is going on in Chester County elections.

### **CRITICAL PROACTIVE STEPS YOU CAN TAKE BEFORE THE CERTIFICATION OF THE NOVEMBER 2024 GENERAL ELECTION:**

#### **Please be peaceful, respectful and lawful when performing the following tasks:**

1. [If you reside in Chester County, Pennsylvania please attend your local commissioner and board of elections meetings immediately and ask for answers to how these patterns are happening.](#) Attend each meeting until the November election. There are public comment periods during the meetings. In Chester County, each person gets 3 minutes to speak, other counties and states may vary. Dates and times of these meetings in Chester County are posted [HERE](#). They are generally on weekdays in the mid-morning. Contact your commissioners at their offices by phone and email. Ask for the elimination of all-voting machines this November and that all ballots, including mail-in ballots, are hand counted at the precincts. **Say NO to centralized hand counting done by Voter Services, even in an emergency.** Ask them to train all of their Judges of Elections, Majority Inspectors, Minority Inspectors and clerks (poll workers) how to hand count ballots before November. A helpful resource may be to review [25 Pa. Stat. § 3062](#) which addresses how ballots were counted in PA prior to voting machines. Additional resources are available [here](#) and [here](#).

#### CHESTER COUNTY COMMISSIONERS:

JOSH MAXWELL 610-344-6151  
MARIAN MOSKOWITZ 610-344-6691  
ERIC ROE 610-344-6031

2. Do a lowest/highest analysis for both parties on the 2022 General Election to determine precincts where poll watchers should be placed for November 2024. Get the 2022 precinct report from your county government website under the election results archive section. This might be found under an elections tab, voter services tab, etc. See which Republican candidate has the lowest vote total in each precinct, and which Democratic candidate has the highest vote total in each precinct. Then do the reverse. Which Democratic candidate has the highest vote total, and which Republican candidate has the lowest vote total throughout every precinct. Poll watchers should go to any precincts that do not follow the patterns that appear in the analysis, and also any precincts that show tie races in the analysis (for example, two races both get the lowest vote total of all R candidates).
3. Take close-up pictures (in sections, top to bottom) and videos of all of the printed out voting machine tapes at the end of the night on election day at your precinct (after 8 p.m.). Make sure the photos and videos are clear and every race and their votes are clearly readable. For the videos, start at the top of the tape and work down to the bottom. Keep the video under one minute long. They should be hung up on a door or in an area for the public to view at each precinct. PA Election Code Article XI-A, Section 1113-A (f) indicates that regarding the tapes, one such record shall be **publicly posted** at the district polling place. HERE is the election code you can print out and show if you have any issues. If you can get to other precincts and take pictures/videos of theirs, please do. Also have mail-in ballot observers ask for printed out copies of the mail-in ballot tabulator reports after the batches are finished being counted. If you cannot get a copy, write down all the races and their vote totals in a notebook. In Chester County, Take pictures of the reports (or your notes of the results) and make sure they are clearly readable, then upload the tapes and reports to <https://votepatterns.com> . Pictures and videos of tapes/reports from every precinct need to be obtained in case any issues arise that prevent the election night reporting websites from functioning or being able to give results. These tapes, videos and reports will be analyzed with the lowest vote total and highest vote total analysis for each party to see if any patterns appear. All precinct tapes/reports are needed so they can all be compared to each other. If you do not live in Chester County, find someone to organize where all of this information should be collected.
4. If there are no issues with your county's internet website, and precinct reports are available, as soon as your county posts their election results on the internet on election night, print out and take pictures and videos of your precinct's results and every individual precinct's results that you can in the county. Make sure you get pictures and video of all the races' scores. All precinct reports for the entire county need to be obtained as soon as possible. Have printer ink ready in your printer. Videos need to be under 1 minute long. In Chester County, upload pictures and videos of your online precinct report to <http://votepatterns.com>.
5. Record how many votes each Republican and Democratic candidate won or lost their race by in each precinct. Doing this showed clear patterns in previous elections. This also will show other races with patterns that might not originally show up in the lowest/highest analysis, especially down-ballot races. Email your analysis of a Chester County precinct to [info@votepatterns.com](mailto:info@votepatterns.com) . You can also take pictures of your findings and upload them to <https://votepatterns.com> .
6. Become a poll watcher at the most critical precincts in your county. Be a poll watcher at a precinct that has not been following the patterns. Make sure you or others are there for the opening and closing of the precinct especially, but all day coverage is needed. Watch to make sure that no one is going into any back rooms or offices to make additional fraudulent ballots. Watch for bags or boxes going into other rooms. Ask to see the poll book at the opening of the day before voters arrive to make sure signatures are not already in them. Above all, make sure you follow your county's rules for poll watchers. If you are being blocked from accessing an area you believe you should be able to observe, ask a constable for assistance.
7. Become a mail-in ballot observer. Observe the transportation of them from the ballot intake area to the counting room if allowed. Watch for carts of ballots going in and out of side rooms they shouldn't be in. Stay until the very end of counting and ask to get a copy of or see the reports that come from the mail-in ballot tabulators. Take notes in a notebook of the race totals in the reports by batch. If a precinct's results are spread out in multiple batches, add the grand total up before taking a picture and uploading it. Take a picture/video of your notes, make sure it is clearly readable, and upload them to <https://votepatterns.com> if you live in Chester County.

8. Vote in person, on election day. Do not vote by mail-in ballot. Cast Vote Records from around the country show that early mail-in ballots are being manipulated. If there is cheating going on through voting machine manipulation, the one way to beat it is to have record turnout where everyone in the voter rolls is voting. Do not think that your vote is a waste of time due to cheating. It can overpower any cheat if enough people vote.
9. If you are a poll watcher at a precinct on election day, determine if the number of ballots handed out is tracked and, if so, find out and report that number at the end of the day. If the number of ballots given out is not being tracked, respectfully ask that they be counted as they are handed out to voters.
10. For poll watchers, be on the lookout for complaints from voters who are told that they already voted via mail-in ballot. Encourage any such voters to immediately register an identity theft claim with the local sheriff.
11. It is becoming clear that the USB sticks need to be inspected by bipartisan members of the public before they are plugged into voting tabulators to make sure there are no preloaded ballots or unauthorized, additional software/malware etc. on them. The Election Management System also needs to be examined by a bipartisan group from the public to confirm no unauthorized software or hardware exists in it. What can be done so that there is a clear transparency as to what is on the county Election Management System and the USB sticks that go to the tabulators, immediately prior to each election? Who programs your county's USB sticks and voting machines before each election? Who runs the Election Management System? How can the public know there is not unauthorized software/hardware/malware on them? Please ask your local county commissioners for the answers to these questions.

Simplified:

1. Do lowest/highest analysis on 2022 to determine precincts where poll watchers should be placed.
2. Get pictures and videos of your precinct voting machine tapes. Upload them to: <https://votepatterns.com>
3. Get pictures and videos of the mail-in ballot tabulator reports. Upload them to: <https://votepatterns.com>
4. Get pictures and videos of your online precinct report on your county election results website. Upload them to: <https://votepatterns.com>
5. Record how many votes each Republican candidate won or lost their race by in each precinct. You can also do it for Democratic candidates. Doing this showed clear patterns in previous elections. Email your results to [info@votepatterns.com](mailto:info@votepatterns.com)
6. Sign up to be a poll watcher or mail-in ballot observer.
7. Vote on election day. Do not vote by mail-in ballot.
8. If you find significant patterns and you are not in Chester County, report your findings to any candidates that are affected.
9. Get to your county Commissioner and Board of Elections meetings and ask for answers to these patterns and for them to eliminate voting machines this November in favor of counting all types of paper ballots by hand, at the precincts. Make sure they are ready to switch to hand counting should any issues occur.
